## A WPATH Global Education Initiative Certified Training Series

### **Best Practices in Transgender Health: Evidence Based Medical and Mental Health Care**

**September 14-16, 2018 | Cincinnati, OH**

WPATH offers our Global Education Initiative (GEI) certified training courses first and foremost to increase access to knowledgeable care providers for transgender people by training healthcare providers globally in the context and principles described in the WPATH Standards of Care and their implementation into practice. As the core curriculum for our WPATH certified provider program, courses are offered in an interdisciplinary, interactive, live format providing ample opportunity for networking and building referral systems.

## GEI Best Practices Training Course Series

**Foundations in Transgender Health** is intended for providers of all experience levels and is the first step toward WPATH certification. This 2-day training course on the implementation of the WPATH Standards of Care combines healthcare professionals from all specialties, it focuses on the importance of an interdisciplinary care team approach and cross specialty foundational knowledge. We cover what all providers should know about gender development, mental health considerations, legal, policy and ethical issues, primary care and preventative health, puberty blockers and hormonal treatment, surgical overviews and much more. Includes interactive multi-disciplinary case studies.

**Advanced Medical Treatment** is a full-day training course that builds upon our multi-disciplinary Foundations Course curriculum and is the 2nd step for those pursuing WPATH certification. This course focuses on advanced hormonal treatment and complications, co-occurring conditions, general health, ongoing primary care and aging. A complicated case studies discussion helps to further understand care and treatment among multiple medical specialties.

**Advanced Mental Health** is a full-day training course that builds upon our multi-disciplinary Foundations Course curriculum and is the 2nd step for those pursuing WPATH certification. This course dives into advanced psychotherapy topics across the lifespan, navigating therapy issues like counter transference, children of transgender people, re-identification, autism, trauma and a complicated cases panel.

**Workshops** are highly specialized half day interactive and/or case-based sessions that focus on specific areas of interest. Workshops are part of our advanced track and intended for those who have completed the Foundations in Transgender Health course. Choose between Working with Children and Adolescents and Planning and Documenting for Medical Transition.
